## QUICK REFERENCE GUIDE

Thank you for purchasing the unit.

## Safety Instruction

1. **Read Instructions -** All the safety and operating instructions should be read before the appliance is operated.
2. **Retain Instructions -** The safety and operating instructions should be retained for future reference.
3. **Heed Warnings -** All warnings on the appliance and in the operating instructions should be adhered to.
4. **Follow Instructions -** All operating instructions should be followed.
5. **Battery -** Batteries shall not be exposed to excessive heat such as sunshine, fire or the like.
6. **Earthing Connection -** The apparatus shall be connected to a MAINS socket outlet with a protective earthing connection.
7. **Water and Moisture -** The appliance should not be used near water.
8. **Ventilation -** The appliance should be well situated so that its location or position does not interfere with its proper ventilation.
9. **Heat -** This appliance should be placed away from heat sources such as radiators, heat registersand stoves.
10. **Power Sources -** The appliance should only be connected to a power supply as described in the operating instructions or as marked on the appliance.
11. **Grounding or Polarization -** Precautions should be taken.
12. **Power Cord Protection -** Power supply cord should be located so that it is not likely to be walked on, or pinched by items placed upon it.
13. **Cleaning -** The appliance should be cleaned only as recommended by the manufacturer.
14. **Non-use Periods -** The power cord of the appliance should be unplugged from the outlet when left unused for a long period of time.
15. **Objects and Liquids -** Care should be taken so that objects do not fall, and liquids are not spilled into the enclosure through openings.
16. **Conditions Requiring Service -** The appliance should be serviced by qualified service personnel when:
    The power-supply cord or the plug has been damaged.
    Objects have fallen on or liquid has been spilled into the appliance.
    The appliance has been exposed to rain.
    The appliance does not appear to operate normally or exhibits a marked change in performance.
17. This appliance should not be exposed to water and no objects filled with liquids such as a vase should be placed on the unit. Where the mains plug or an appliance coupler is used as the disconnect device, the disconnect device shall remain readily operable.
18. Only for indoor used. ( ⌂ ).
19. **Caution -** There is a button cell inside. Place away from the old and kids, avoiding to be eaten by mistake. Once happened, please go to hospital for treating immediately.
20. Keep the key properly. There are high voltage and dangerous live parts inside. It's better to maintain and repair with a professional.
21. **Warning -** Operation of this equipment in a residential environment could cause radio interference.

| | | |
|---|---|---|
| **Warning** High voltages are used in the operation of this product. Do not remove the back cover of the cabinet. Refer servicing to qualified service personnel. | **Warning** To prevent fire or electrical shock hazard, do not expose the main unit to rain or moisture. | **Warning** Do not insert foreign objects into the unit's slots or openings. Never spill any kind of liquid on the unit receiver. |
| **Caution** If the unit is placed into a confined space, ensure that the minimum distances are observed as shown. Heat build up can reduce the service life of your unit , and can also be dangerous. | **Caution** Never stand on, lean on, push or apply force to the product or its stand. You should pay special attention to children. | **Caution** Do not place the main unit on an unstable cart stand, sheif or table. Serious injury to an individual, and damage to the unit ,may result should it fall. |

Minimum distances: 10cm, 10cm, 5cm, 20cm

| | | |
|---|---|---|
| **Caution** | **Caution** | **Caution** |
| When the product is not used for an extended period of time, it is advisable to disconnect the AC power cord from the AC outlet. | Avoid exposing the main unit to direct sunlight and other sources of heat. Do not position unit receiver directly on other products which give off heat.e.g. video cassette players, audio amplifiers. Do not block the ventilation holes in the back cover. Ventilation is essential to prevent electrical failure. Do not squash power supply cord under the main unit. | The panel used in this product is made of glass. It can break if the product is dropped or if force is applied to the panel. Individuals should execute caution when dealing with broken glass should the panel break. |
