# Installation and operation instructions

Note:please read the instructions carefully before installation!

## Step 1

Use the wall plate as a templet to drill six holes of 10mm diameter and 50mm depth in the concrete wall. Then wedge six plastic anchors into the holes.

Step 2:

Install the wall plate. Put the wall plate on the wall, and then screw six lag bolts into each plastic concrete anchor through metal washer to fix the lag bolt, the plastic concrete anchor and the wall.

### Step 3

Install the monitor brackets onto the back of the panel TV:each monitor bracket should be fixed with two screws, H/I/J/K/L/M/N/O.And the distance from two brackets to the top of the panel TV should be equal and the position of the brackets should be at as center as possible. The knob shall face outward from the panel TV. The parts shall be selected according to the dimensions of the holes in the back of the panel TV.

-10°

Step 4:

Hang the two monitor brackets on the wall plate.Loosen hands until hung firmly. The knobs should be loosened before adjust the angle of view for the flat panel TV between 0°~ -10°, After the position has been determined, the knobs in two sides of it should be screwed down furthest.

Step 5:

There is a bolt under each monitor bracket. Screw it at the lowest position before installation. After the orientation of TV panel has been determined and the knobs have been screwed down furthest, re-screw it to fix the monitor brackets with the wall plate.

### Notes

STEP 4
